Claims 1-24 are presented for examination on the merits.

Further, the Information Disclosure Statement filed December 6, 2001, has been received and references have been considered as indicated on the enclosed PTO-1449 Form.

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CAR 1.321© may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CAR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CAR 3.73(b).

2. Claims 1-24 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over all claims of U.S. Patent No.(s) 6306641, 5854061, 5824541 and 5593888. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims would have been made obvious over these cited patented claims because the only difference between each of the sets of claims is scope. Each of the patented claims for each patent would have made obvious remediating steps of the instant claims because microenfractionating is useful for degradation of debris, biocontaminants,

etc. Further, it is unclear that the restricted material in 09/197079, now U.S. Patent No. 6,306,641, is pending herein. It appears that the invention as filed herein is different than the previously non-elected groups. Thus, an obvious double patenting rejection is not prohibitive in the instant case.
